Planet Song

<https://www.youtube.com/watch?v=mQrlgH97v94>

Mercury is the closest planet to the sun.
Venus comes next, it's the hottest one.
Earth comes third the only life that we know.
Mars has the largest canyon and volcano.

Mercury, Venus, Earth, Mars, Jupiter,
Saturn, Uranus, Neptune.
The gassy planet Jupiter, the largest you
will find. Saturn has rings around the
outside.

Uranus is funny cause it spins on its side.
Neptune looks blue, the coldest of its kind.
Mercury, Venus, Earth, Mars, Jupiter,
Saturn, Uranus, Neptune.

Okay get ready We are going to say all
the planets really, really, really fast.
Can you keep up.

We are going to say all the planets from
the first to the last. Mercury, Venus,
Earth, Mars, Jupiter, Saturn, Uranus,
Neptune
