20	Compare the Malwa Plateau with the Chota Nagpur Plateau.	3
21	List the main industries Flourishing in Haryana and Assam.	3
	SECTION – D	
	Read the passage carefully and answer the questions that follow.	
	The Southern Plateaus are in the southern part of India. They are among the oldest landforms in the country. The land is mostly rocky and uneven. Many rivers such as the Narmada, Godavari, Krishna, and Kaveri flow across this region. These rivers provide water for farming and daily life. The Southern Plateaus are rich in minerals like coal, iron ore, manganese, and mica. Many industries have developed because of these mineral resources. Black soil is found in many parts of the Deccan Plateau. It is very suitable for growing cotton. Farmers also grow millets, sugarcane, ground nuts, and pulses. The Western Ghats receive heavy rainfall and are covered with thick forests. The Eastern Ghats are lower and not continuous. Many wild animals and birds live in the forests of this region. People depend on farming, mining, and industries for their livelihood. The Southern Plateaus play an important role in India's economy because of their rich natural resources.	
22	Mention four crops grown in the Southern Plateaus.	1
23	Differentiate between the Western Ghats and the Eastern Ghats using the passage.	1
24	Name the oldest landforms mentioned in the passage.	1
25	Give two occupations of the people living in this region.	1
